Preparing Your Frother

1. **Place the frother on a flat, stable surface** and plug it into a power outlet.
2. **Remove the lid** and check the inside. Make sure the detachable whisk is securely in place. If you want thick froth, use the frothing whisk; for heating milk only, use the heating whisk.

3. **Pour in fresh milk** up to the indicated max fill line. Avoid overfilling to prevent spills or damage.

Tip: For the best froth, use cold, fresh milk with a higher fat content like whole or 2%.

Selecting Your Desired Mode

The Vava frother typically offers three modes:

- **Hot Froth:** Heats and froths milk simultaneously. Perfect for cappuccinos or lattes.
- **Cold Froth:** Froths milk without heating—ideal for iced coffee drinks.
- **Heating Only:** Warms the milk without frothing, suitable for hot chocolate or tea.

Press the button corresponding to your desired mode. The device will start automatically.

Operating the Frother

Once the mode is selected:

- The frother will start spinning the whisk inside the milk.
- It will automatically stop when the process is complete, usually within 2 to 3 minutes.
- Avoid opening the lid during operation to ensure even frothing and safety.

After the frother stops, wait a few seconds to let the froth stabilize.

Pouring and Serving Tips

To get that perfect pour:

- Gently tap the frother on the counter to break up large bubbles.
- Use a spoon to hold back foam if you want to pour just the milk first, then spoon the froth on top.
