Ice Cubes Are Too Small or Incomplete

This issue can arise if the water level is too low or if the ice maker is in a warm environment. The manual recommends adjusting the temperature setting and ensuring the machine is placed away from heat sources.

Ice Maker Is Making Strange Noises

Audible sounds like rattling or buzzing can signal that the ice tray is shifting or that the compressor is working harder than usual. The manual guides you to check that the ice tray is properly aligned and that the unit is on a flat surface.
