Proper maintenance is key to prolonging the life of your Royal 18MC shredder. The shredder manual provides guidelines on how to clean, lubricate, and store your device, ensuring it continues to operate smoothly.

Cleaning the Shredder

Dust, paper particles, and residue from shredded materials can build up inside the shredder over time. To clean the shredder:

- Unplug the shredder before any cleaning.
- Empty the waste bin regularly to prevent overflow.
- Use a soft brush or compressed air to clear paper dust from the blades.
- Wipe the exterior with a damp cloth to keep it looking clean.

Regular cleaning prevents malfunctions and keeps your shredder looking and working like new.

Lubricating the Blades

One of the most important maintenance tasks detailed in the Royal 18MC shredder manual is blade lubrication. Properly lubricated blades reduce friction, prevent overheating, and extend blade life.

- Use shredder oil or lubricant sheets specifically designed for shredders.
- Apply oil directly to the shredder blades or run lubricant sheets through the machine.

- Turning off and unplugging the shredder before attempting to manually remove paper.
- Avoiding excessive force to prevent damage to the cutting blades.

Overheating and Motor Protection

The Royal 18MC comes with a thermal overload protector to prevent motor damage. If the shredder stops working after extended use:
